EDUCATION

GEC Gandhinagar

Aug 2024 – Present

BE Electronics and Communication

CGPA: 7.8

- Independently studied backend development: Node.js, Express, PostgreSQL, and REST API design

PROJECTS

E-Commerce API | [Github](#)

- Built a production-style **e-commerce REST API** in **Express 5 + TypeScript** with **PostgreSQL** and **Prisma 7**, covering user auth, product and category management, and a full cart flow (add, update, remove, stock validation).
- Implemented **JWT** authentication (Bearer + httpOnly cookie), **bcrypt** hashing, **role-based access control** (ADMIN/STAFF/BUYER), and **Zod** request validation with centralized error handling.
- Designed paginated, filterable, sortable, and searchable list endpoints; built a password reset email flow with **Nodemailer**; and wrote router, controller, service, and integration-style tests using **Vitest** and **Supertest**.
- *Technologies: Node.js, TypeScript, Express, PostgreSQL, Prisma, JWT, Zod, Nodemailer, Vitest, Supertest*

Gym PR Tracker | [Github](#) | [Website](#)

- Developed a production-ready **REST API** using **Express + TypeScript**, backed by **PostgreSQL** and **Prisma ORM**, enabling user-scoped personal record (PR) management (create, read, update, delete).
- Secured routes with **JWT** (Bearer tokens and httpOnly cookies) and **bcrypt** for password hashing; enforced request integrity using **Zod** validation middleware.
- Configured **CORS** for multi-origin deployments, validated all environment variables at startup with **ot3-oss/env-core**, and deployed on **Render** with a Vite + React SPA (AI-assisted) as the frontend.
- *Technologies: Node.js, TypeScript, Express, PostgreSQL, Prisma, JWT, Zod, Render*

Bookmarks API | [Github](#)

- Developed a **REST API** in **FastAPI + Python** with **SQLAlchemy ORM** and **SQLite**, exposing endpoints for user registration, JWT-based auth (including token refresh), and authenticated bookmark CRUD.
- Enforced data integrity with **Pydantic** schema validation, secured passwords with **bcrypt**, and leveraged FastAPI's auto-generated **Swagger UI** for interactive documentation.
- *Technologies: Python, FastAPI, SQLAlchemy ORM, SQLite, Pydantic*

SKILLS

Programming Languages: JavaScript, TypeScript, Python

Frameworks & Libraries: Node.js, Express, FastAPI, React, Vite, Tailwind CSS

Tools & Platforms: Git, GitHub, Prisma, Zod, JWT, REST APIs

Databases: PostgreSQL, SQLite

Languages: English, Hindi

CERTIFICATIONS

CS50P: Introduction to Programming with Python | [Certificate](#)

2024

- Harvard University's introduction to programming using Python, covering functions, exceptions, file I/O, libraries, and unit testing with **pytest**.
